

The FAA Safety Team presents:

Flight Into the Great Unknown

Pilots flying under Visual flight Rules (VFR) who inadvertently fly into instrument meteorological conditions (IMC), continues to be a significant safety hazard to General Aviation (GA) flights. At this seminar we will discuss risk factors that lead to inadvertently flying into IMC and how pilots can mitigate the risks. We will also look at the causal factors of GA accidents caused by poor fuel management, which happen nearly twice a week! Whether the result of fuel exhaustion, starvation or contamination, these mishaps are easily preventable. Join us for a review of some past accidents and tools you can use to prevent yourself from becoming a fuel management statistic. Please click on the link below for more information and to register online!

Directions: See map link for directions, seminar is in the Luftladder Hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
